PROFILE

Software Developer – Python (AI/ML) with 1+ year experience in Computer Vision & NLP. Skilled in Python, ML/DL, and real-time application development with PySide6 & OpenCV. Experienced in modular pipeline design, GPU optimization, and production-ready solutions.

EXPERIENCE

Software Developer – Griffyn Robotech Pvt. Ltd.

Pune, India | Nov 2024 - Present

- Built vision-based smart camera solutions (Python, PySide6, OpenCV, TensorRT, Jetson).
- Integrated AI modules into production systems, ensuring reliability on edge devices.

Intern – CDAC, Noida

Noida, India | Sept 2022 – Feb 2023

- Worked on Big Data stack (Hadoop, PySpark, ML, Scikit-learn)
- Developed ML prototypes with Hadoop/PySpark, gaining hands-on big data processing experience.

PROJECTS

Smart Camera Vision System

- Designed real-time CV pipelines on Jetson using OpenCV/TensorRT, reducing latency 30%.
- Implemented OCR, barcode/QR decoding, object detection, measurement, and color classification modules with accuracy improvements of up to 88% in testing.
- Optimized GPU with PyCUDA for scalable embedded deployment.

Sentiment Stream: Real-time review analysis

- Built an end-to-end NLP pipeline for real-time product review analysis using Python, LSTM, and Streamlit.
- Applied preprocessing (tokenization, lemmatization, embeddings) and trained deep learning models.
- Deployed as an interactive Streamlit web app with real-time predictions; published clean modular code on GitHub.

Full-Stack Packaging Automation

- Built a Python (PySide6, SQLite, Socket) desktop app to automate reverse logistics workflows.
- Replaced manual processes with a scalable, real-time system, reducing bottlenecks and improving efficiency.

SKILLS

Python, OpenCV, NLP, PyTorch, TensorFlow, Scikit-learn, NumPy, Pandas, TensorRT, PyCUDA, SQL, Docker, Kafka

EDUCATION

- PG-DBDA, CDAC Pune, 2024
- B.Tech (CSE), AKTU Uttar Pradesh, 2023

HOBBIES

Lo-Fi music creation and reading about astronomy.
